

**2014 Herd Creek Allotment  
USFWS Monitoring Report**

**Annual Monitoring Report Form for Actions covered under the Service's Biological Opinion for  
Grazing on Allotments managed by the Salmon-Challis National Forest.**

Please submit annually by **March 1** to the Supervisor of the Service's Eastern Idaho Field Office:

**4425 Burley Dr., Suite A, Chubbuck, Idaho 83202  
Telephone: (208)237-6975.**

Please include name and contact information in case additional information is needed.

1. What was the name of that stream in this allotment surveyed for impacted redds? **None-livestock were off the unit that has bull trout spawning habitat on August 12, 2014.**
2. What was the date of the survey, and what were the water conditions? **N/A**
3. Which stream segment was surveyed and how many redds and impacted redds were found? (Please give GPS start and stop points for segments)? **N/A**
4. What was the date that livestock removed from the pasture with surveyed stream segment? **N/A**
5. Did this number exceed the scale anticipated in section VII of the Biological Opinion? **N/A**
6. Were there any changes to the grazing management that differed from the proposed grazing management in the Forest's Biological Assessment? If yes, what were they? **None.**
7. Were there any unexpected circumstances or events that resulted in impacts beyond those anticipated in the Forest's in the Biological Assessment or the Service's Biological Opinion? If yes, please describe. **Use standards for minimum stubble heights were exceeded in the Lake Basin unit. The 2014 measured stubble height was 3.5" and the standard for this site in Lake Basin is 6".**

Salmon-Challis NF Official: **Barry Dopp (range management specialist), Bart Gamett (fish biologist)**

Date: **January 22, 2014**
